12. You can also hyperlink text to take you to the URL without showing the address
13. Highlight the text with your mouse
14. Click the Link button
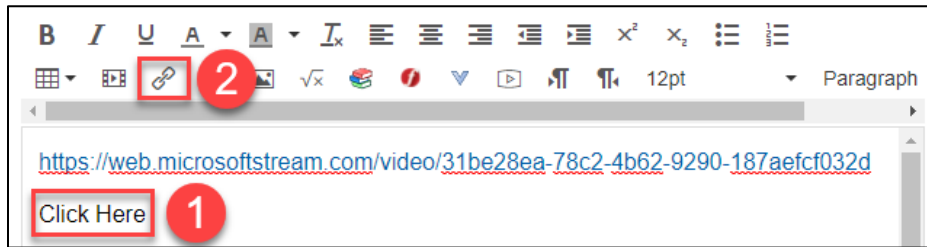

15. The Link to Website URL window appears
16. Select the text box and paste the URL you copied from Microsoft Stream
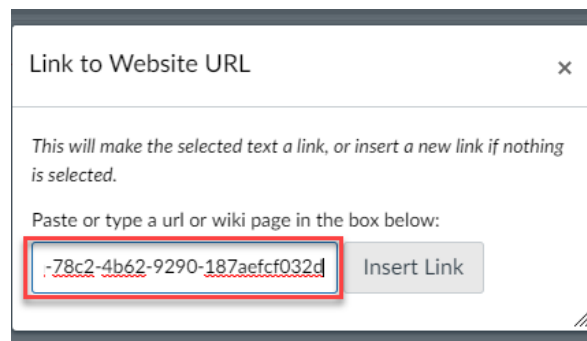

17. Select Insert Link to make the text clickable
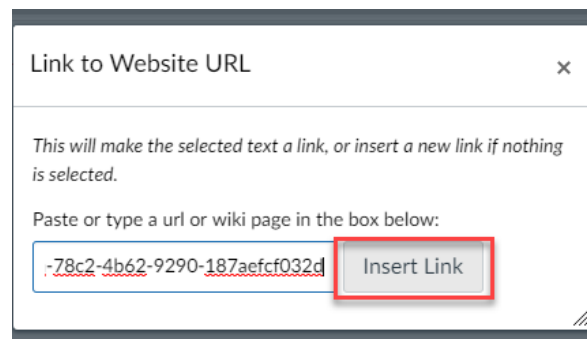

18. Click the Save button to keep your changes

19. Your text is now interactive! Try clicking on the link to visit the presentation

20. Your presentation should appear in a new tab. Students will be able to see this video, as long as the permissions are set correctly.
21. Select the Embed option to find the code to put the presentation directly in Canvas
22. There are a number of options to select, including Responsive, Autoplay, and Video Size. We recommend Autoplay stay Off.
23. Select the Copy button to keep the code so you can paste it in Canvas later
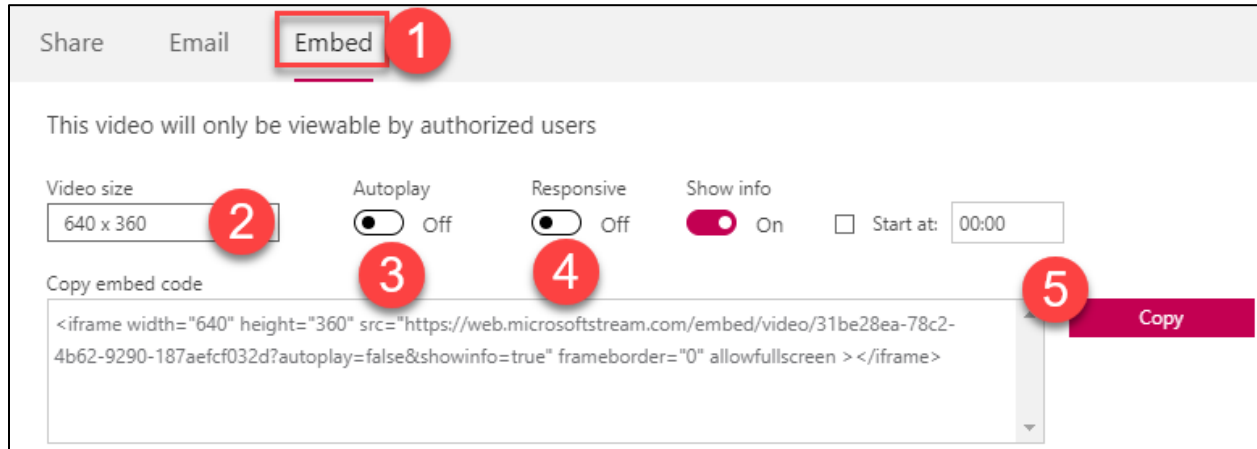

24. Back in Canvas, select the Edit button

25. Select the location to place the embedded video
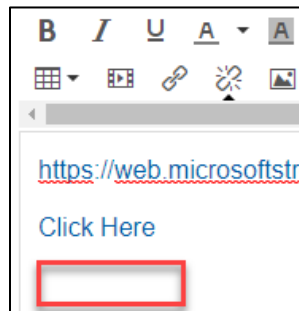

26. Select Insert/edit media
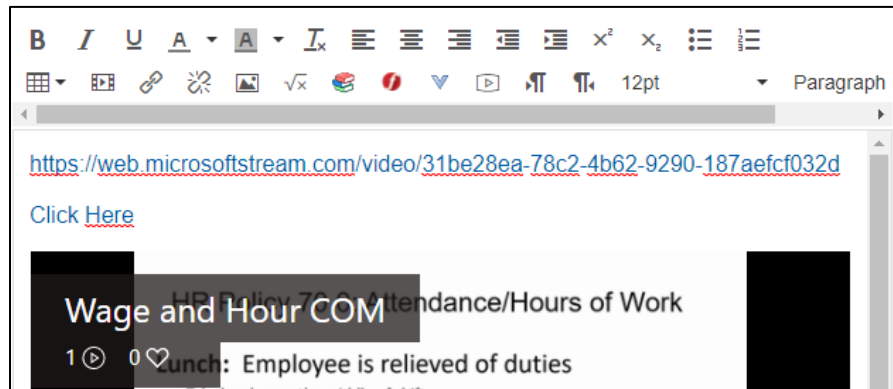

27. Select the Embed option

28. Select the text box and paste the code you copied from Microsoft Stream

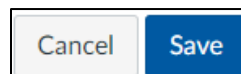

29. Select Ok to embed the presentation
30. You should see the video appear in the text editor

31. Select Save to keep changes

32. Students can now play the video from the Canvas course
